To whom it may concern:

This is the first time I attended the Ohio TESOL. The experience was very positive. I met a lot of interesting people and shared ideas. The presentation that really impressed me was the Latin American. The Hispanic/Latino culture, the people and educational systems. (Senia Aguila) were very interesting I met with a lot of Latin people from different countries. I am a Puerto Rican and many times the traditions are different.

This experience helped me to better serve the students. For example, the alphabet, the family, Latino values, education and Hispanic values in the classroom. We discussed Educational Systems in other countries. I talk to students about different music from the other countries.

In general I talk to them about the meaning of Hispanic and Latino. <sup>time</sup> By doing this the students in the classroom feel comfortable.
